

Calculating TF-IDF scores (by hand)

Consider the following sentences:

1. "The best Monty Python sketch is the one about the dead parrot, I laughed so hard."
2. "I laugh when I think about Python's Ministry of Silly Walks sketch, it is funny, funny, funny, the best!"
3. "Chocolate is the best ice cream dessert topping, with a great taste."

Convert the sentences into numeric vectors using tf-idf scores.
